

About the Back to Basics (B2B) course:

The course aims at **providing 'insider information'** – the tips and tricks that artists use when drawing the human figure, so that by the end of it you will have much improved your life drawing skills. It is a **10 week course** where we look in depth at all the fundamentals needed for life drawing.

We start at the very beginning, by **learning various systems to simplify the drawing of the human figure**; we then **look in detail at all the other issues that students typically struggle with**, such as foreshortening and perspective, measuring, how to draw facial features, hands & feet, how to use shadow & light, and so on. **Essential anatomy** is incorporated as part of each lesson. What will be of great interest to the student are the **artists' shortcuts** which artists have developed over the past 400 years to deal with the trickier aspects of the human figure.

The entire course is **practice based**, *not* lecture based, this means that everything is taught in the process of the students practising their skills.

Cost

£120 (£100 concs.) – this price includes all materials.
